This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

MONTHLY CATALOGUE.

JOHN H. HICKCOX, - - - - - - - - - - Editor.

VOL. IX. WASHINGTON, D. C., JANUARY, 1893. No. 1.

Refused entry as second-class matter at the Post Office, Washington, D. C.

This Catalogue contains the titles of all the current official publications of the United States, including the reports and papers issued by Departments, Bureaus, Commissions, and other organizations of the Government; all the documents printed by order of Congress—that is to say, the Executive Documents, Reports of Committees, Miscellaneous Documents, Journals, and Debates of both Houses.

The arrangement of the titles is alphabetical, under authors' names as regards special treatises, and under topics as regards Congressional documents. At the same time the Departments, Bureaus, Commissions, etc., are credited with the works issued under their supervision. A valuable feature of the work consists in the separate entry of every paper or contribution contained in Reports, Bulletins, or other publications of the Government. A general Index at the end of the volume.

Subscription price $5.00 per annum.

NOTE: All correspondence relating to the Catalogue or to the publications of the United States Government should be addressed to the publishers,

W. H. LOWDERMILK & CO.,
1424-1426 F Street, Washington, D. C.

Apologies are disagreeable in every sense, and should never be necessary, but we feel that in justice to ourselves we should explain that the late appearance of the CATALOGUE for the first three months of 1893 is largely to be accounted for by the fact that up to the adjournment of Congress, on the fourth of March, it was probable that the proposed printing bill might become law, in which event the continued publication of the CATALOGUE would have become impossible. After the adjournment the work was prosecuted as rapidly as possible. The April and May numbers will follow in a few weeks.

THE GOVERNORS OF VIRGINIA.

A BRIEF REVIEW OF THE DISCOVERY OF THE CONTINENT OF NORTH AMERICA,

WITH

A HISTORY OF THE EXECUTIVES

OF THE COLONY AND OF THE COMMONWEALTH OF VIRGINIA.

—BY—

MARGARET VOWELL SMITH.

8°, Cloth, Illustrated, 457 pages; Price, $2.50, Postpaid.

The purpose of this book is to lay before the public, in a convenient form, a review of the Governors of Virginia from the establishment of the Colony to the present day.

Without a history of the State is not attempted, this work may yet be considered a [illegible] commentary upon it, and a map d'ensemble of many important events connected with the early settlement of the country.

The foundation of the Colony of Virginia was the foundation of the United States; the two facts are one and inseparable, and every lover of America must take an equal interest and pride in both.

Various rare and explanatory State Papers are embodied in this volume, and the personal sketches are gathered from the most authentic sources.

The author has done the work from pure love of it, without thought of pecuniary compensation, and with a view only to placing so much history easily and attractively within reach of the general reader, and of those interested in the old Dominion and its [illegible].

The style is smooth, terse, and clear. The book is well printed and bound, and the price is moderate.
